INTRODUCTION

Argentina, the second largest nation in South America, extends 2,300 miles down the continent. It is a land of striking scenic contrasts — lush tropics in the north, towering Andes to the west, and wide beaches along the Atlantic coast. Its southernmost tip points to the Antarctic circle.

The pampas lie in the heart of Argentina. These fertile rolling plains, used for crop raising and the grazing of livestock, provide the economic life-blood of the country. Most of the population earns its living in some phase of agricultural activity.

There are over twenty million people in Argentina and more than twice as many head of cattle. The Argentine is famous for its fine quality beef, which is found in abundant supply in the restaurants and markets throughout the country. The cattle is tended by gauchos, heroes of the Argentine's songs and legends, who still drink their wine from cowhide sacks, decorate their belts with silver coins and play their guitars during the quiet of night on the pampas.

Argentina was officially a Spanish colony until 1816, but began to govern itself in 1810. No man did more for the cause of independence in Argentina than José de San Martin, the South American born soldier and statesman. San Martin gave up a colonelcy in the Spanish army in 1812 and returned to Buenos Aires, where his able leadership helped to maintain the autonomy of Argentina. He was convinced that if Argentina was to preserve its independence, Spanish forces would have to be driven out of Peru and Chile. This he achieved with a courageous and daring strategy. San Martin was unable to live a peaceful private life in the countries he had helped to found. Threats from royalists and jealousy of patriots forced him to leave his native soil. He died a lonely exile in France.

The story of Argentina is revealed through its postage stamps. We hope you will find many rewarding and enjoyable hours with your stamps and that this Minkus Album for Argentina and Uruguay will prove a great asset to your collecting pleasure.
