I have never seen so much perforation varieties being used during the printing process of a stamp. New Zealand is a very surprising caser, durng the first decades numerous stamps were printed on different paper qualities and different perforations, being very difficult to classify them. The six pence stamp (Sg 163, 170, 183) is one example: 10 x 12.3/4; 11.3/4; 12; 12.1/2; 13.1/4 (hand cancellation); 12 x 12.1/2; 12.1/2; 12.1/2 x 13; 12 x 12.1/2; 12.3/4. Scott and St. Gibbons catalogs only mention; 12.1/2, 12.1/2 and 10, 12 x 11.1/2.
