The 5/- Ox-wagon, SG 64 & 64b or SACC 62 & 62a 1927

Issued in October 1933 this is the first stamp to appear with a hyphen between SUID & AFRIKA. There is, in fact, no unhyphenated rotogravure issue of this stamp. The first issue was in a grey-black & myrtle green shade with the watermark upright or inverted. In fact, in this shade the watermark inverted is a little more common than the upright. All later issues have the watermark upright. The catalogues divide the stamps into frames which are either "green" or "blue-green". This is rather misleading. The first shade is relatively scarce and there is a typical blue-green frame which was issued in 1945 which is more common. There are, however, a number of other shades which are also relatively common but aren't blue-green. A jet-black & intense green shade appeared in 1940 and again towards the end of the decade. A black & grey-green shade was issued in 1947 and the stamp was "re-issued" in 1950 (after the first screened issue) in jet-black & blackish-green. Which shade grouping you wish to place these stamps in is up to you

WMK upright. Blue/green shade. MNH. Beautiful fresh stamp.

WMK upright. Blue/green shade. MNH. Beautiful fresh stamp. Well centered.

WMK upright. Blue/green shade. MNH. Beautiful fresh stamp. Well centered.
