South West Africa
1929 Officials

1929, May. This second issue had SWA on the bottom of the stamps. The 2d King's head was replaced by the Union 2d pictorial. The small format stamps did not have stops, but the 2d was set up with stops, a number of which were missing. The typo stamps were all Pretoria Printings.

South West Africa
1929 Officials 3rd Issue

1929, August, 3rd Issue. The overprint turned to read up on the small format stamps, and the SWA moved to just below the Official on the 2d. The 2d overprint also averages somewhat lower on the stamp, but examples can be found that overlap the positioning on the 2nd Issue. It appears that the 2d forme from Issue 2 just had the country name reset, as varieties of the 2nd Issue repeat (although not catalogued in SACC). No varieties are known on the other values.
The 2d gutter strip below proves that the 2d base stamp is the 3rd Issue, which came out in April of 1928

**South West Africa
1929 Officials 3rd Issue, Varieties**

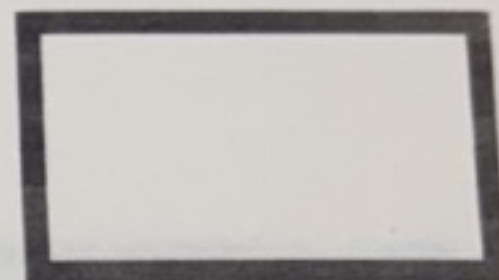

Although SACC does not list any major varieties for this issue, it appears that the 2d shows all the varieties of the previous 2nd Issue which came out earlier in the year. Becker lists and illustrates the no stop varieties. Below is shown the the "dropped Official" variety on a stamp from the 1st column. the other varieties of 'broken 'O'', dropped 'Offisieel', and raised Official' also probably occur. Becker also notes that the second 'i' in 'Official' is found damaged on all three small format values. The 'i' curves left and the bottom is damaged.

1938. 1 1/2d

1800

1938 July 1. A new value, 1 1/2d was issued for the new letter rate. The overprint is large, 2mm high, and in red.

A few minor constant errors are found, especially stamp 2 of row 10, where the bottom leg of the 'L' in Official is missing. Also 'FI' for 'FF' in Offisieel (row 2/1), 'F' for 'E' in Offisieel and dot in the 'O' in Official (row 6/6 right pane).

17. 1 1/2d 500

22. 6d 400

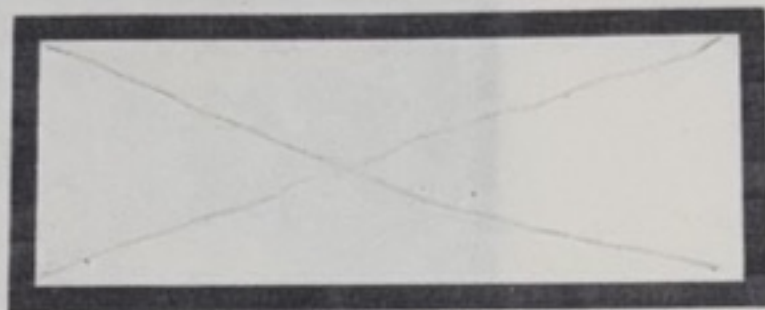

860

South West Africa
1951 Officials

1951 November 16. A new set of Officials with heavier type was issued in three printings. The first printing had the overprints transposed on the bottom 5 rows of the left pane. The second print had half of the stamps transposed, as the vertical columns were monolingual. the 3rd printing was all correct. No transpositions occur on the 1/2d value, which must have been done in the 3rd printing.

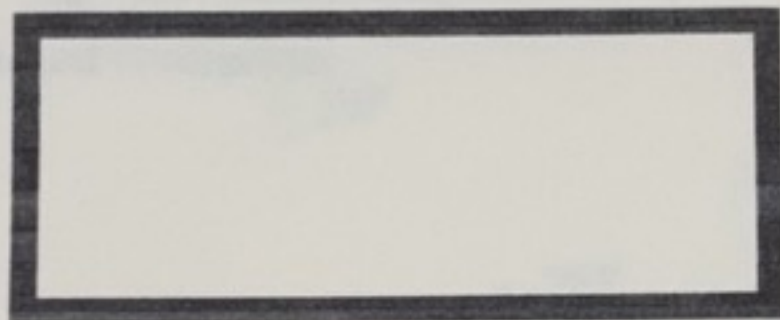

SACC note that there were two different typefaces used. Type a, with normal lettering, and type b with a heavier lettering. They also say that these typefaces are in different colours, type a in deep red and type b in light crimson red, but this is hard to square with the information above.

23. 1/2d

**South West Africa
Postage Dues 1928 Type V O/P**

This Type V overprint was Shipped in June of 1924, but not issued until 6 August 1928, after the Type VI overprints. No postage stamps used this overprint. The spacing is now 12 mm between the lines. 200 panes were issued of the 1/2d and 1d and 100 of the 3d and 5d.

Very few varieties in the overprint. The 5d shows the no stop after Africa is the only major one. The base stamps show the missing perf hole in the S. African values and there are minor plate flaws

**South West Africa
Postage Dues 1923 Type II O/P**

1923 Dues. Type II overprint. Still Zuid-West, but 10 mm between lines. Varieties, 2d 'No stop Afrika'. 3d No stop Afrika, West for West, and dropped '3' on last column. 5d no varieties.

There are 1d values with this Setting Type II known. For unknown reasons, 1 pane of 60 was overprinted by the government printer and released to Windhoek in error. So it seems to be legitimate, although unauthorised.
