a personal sense of how great a man he was. I first met him in 1917 when he was seventy years old. I was at once impressed by his charming personality, his wisdom, his enthusiasm and his inquiring interest in the world about him. Yet uppermost in my memory of Mr. Bell is the recollection of his great kindliness and his concern for the welfare of others. To me, it is a happy and inspiring thing that in the

goes to press, most of the unions have given notice that if satisfactory agreements are not reached they will go on strike on April 7, 1947. The Companies have been bargaining continuously and most have offered to arbitrate the question of wages. Every effort is being made to reach satisfactory settlements and to maintain uninterrupted telephone service.

The continued outlay of vast sums of money for plant expansion is necessary in order to meet the demands for new installations and to restore and make even better the prewar quality of service. Additional funds for this purpose became available April 1 from the sale by the A. T. & T. Company at competitive bidding of $200,000,000 Thirty-Five Year 2¾% Debentures. The $343,000,000 Fifteen Year 2¾% Convertible Debentures offered to stockholders for subscription late in 1946 are convertible into stock on and after April 15, 1947 by surrender of $100 principal amount of Debentures and payment of $50 in cash for each share.

The current rate of earnings is below the average for the last twenty-five years and the costs of providing service have greatly increased. Many of the Bell Telephone Companies have consequently found it necessary to seek increases in telephone rates. Increased rates amounting to $15,000,000 annually have become effective in eleven states, in three of which the increases are effective under bond pending final decision by the regulatory authorities concerned. Applications for rate increases have been made in fifteen other states. To obtain the large amounts of money for the huge construction program, it is essential that the System's credit and its financial structure be maintained on a sound basis.

WALTER S. GIFFORD,
PRESIDENT.

American Telephone and Telegraph Company

NEW YORK, APRIL 4, 1947.

TO THE STOCKHOLDERS:

The Bell System added more than 800,000 new telephones in the first quarter of 1947, bringing the total in service to about 26,500,000. Demands for service continue at a high level and there are no signs of the demands slackening. Despite the rapid rate at which new installations are being made, there are still nearly 2,000,000 people waiting for telephone service. A substantial proportion of the unfilled applications were received since the first of the year. We are continuing our utmost efforts to furnish telephone service to everyone who wants it at the earliest possible time.

The total number of local, toll and long distance calls handled by the Bell System rose to an average of 156,000,000 daily at the end of the first quarter. This is 5,000,000 more calls each day than at the beginning of 1947.

The various Bell System Companies have been presented with very large demands by the unions. Over the years the managements of the Companies have succeeded in keeping a balance between employees, investors and telephone users which, on the whole, would seem to have been fair to everyone. They are continuing their efforts to keep a fair balance. Up to the date that this statement
