20Cs. Hugonia Tomentosa (Liane à Crochet) – Linaceae
A woody endemic climber with beautiful hairy leaves. The opposite hook-shaped woody tendrils are very characteristic of this plant. Its golden yellow flowers appear usually in September/October.
Re.1. Ochna Mauritiana (Bois Jasmin) – Ochnaceae
An endemic deciduous shrub which flowers copiously in December/January. The white flowers, which usually appear before the leaves, give a very attractive blossom to the forest of the plateau.
Re.1.50. Dombeya Acutangula (Dombeya) – Sterculiaceae
A rare indigenous shrub whose pink flowers in bifid cymes cover the plant completely, giving a splendid and colourful appearance.
Rs. 5. Trochetia Blackburniana (Boucle d'oreille) – Sterculiaceae
A low bushy endemic shrub which grows on the plateau. It flowers profusely – some varieties sport striations on the pink petals. The big pendulous bell shaped flowers resemble earrings, thus the common name "Boucle d'oreille". Often called the national flower of Mauritius.
