Less spectacular, but technically more interesting, is another variety that occurs with overprint Setting 1, **Line** over **Saorstát**. This is found on the four values ½d, 1d, 2½d and 9d each in a different, but constant, position. The line was due to loosening of the alignment segments (leads) used to space the overprint cliché type. These marks confirm that the setting was type-set and not made up from stereos.
